Ascentz Technologies

- **Platform Development:** Built and maintained core features for Penlli Connect, a community-specific matrimony platform for the Arya Vysyas community, including Jathagam (horoscope) React, Node, Express (TypeScript).
- **SMS Gateway Integration:** Integrated OlaSMS as the platform's SMS gateway, replacing Twilio, including API credential setup and compliance with India's TRAI/DLT regulatory requirements for Sender ID registration.
- **Product Debugging :** Diagnosed and resolved a Node.js deployment issue on cPanel/Passenger, tracing intermittent Sequelize/MySQL connection failures to trailing whitespace in environment variables.
- **UI/UX Collaboration:** Contributed to UI/UX planning and design specifications for 16 application screens using Figma and AI-assisted design workflows.
- **Version Control & CI/CD:** Streamlined development workflows utilizing Git and GitHub for rigorous version control, maintaining clean repository architectures, and driving collaborative team workflows.

PROJECTS

Penlli Connect – Community Matrimony Platform (Arya Vysyas Community) [Link](#)

- Tech Stack: React.js, Node.js, Express.js, MySQL, REST APIs, JWT, OlaSMS, Razorpay, Selenium
- Built a production matrimony platform with Jathagam (horoscope) matching for the Arya Vysyas community. Developed and integrated REST APIs, authentication workflows, database operations.
- Diagnosed and resolved production deployment and database connectivity issues involving Node.js, cPanel/Passenger, Sequelize, MySQL, and environment configurations.
- Implemented secure REST APIs with JWT authentication, Photo/Jathagam upload, premium verify, and SQL Injection (SQLi)based profile verification management.

AgriVision AI – AI-Powered Crop Health & Farming Assistant [Link](#)

- Tech Stack: React.js, React Native, Node.js, Express.js, MongoDB Atlas, TensorFlow.js, Hugging Face, JWT, Personal project building an AI-powered mobile app for Tamil Nadu farmers, focused on crop disease detection.
- Architected a full-stack system: React.js/React Native frontend with client-side TensorFlow.js inference, Node.js/Express backend (Auth, Crop Analysis, Market, Community routes), and MongoDB Atlas.
